Asian Development Bank's 58th Annual Meeting

ADB58: Annual governors meeting address collective action to solve complex challenges

HE President David Adeang attends annual ADB meeting as governor for Nauru

The Asian Development Bank's 58th Annual Meeting of the Board of Governors officially opened in Milan, Italy by President Masako Kanda, with the theme, Sharing Experience, Building Tomorrow.

It is the first time for Italy to host the annual meeting, 5-7 May.

As Minister for Finance, President Adeang is Nauru's governor on the ADB board, and was accompanied by Deputy Minister for Finance Delvin Thoma.

The meeting highlights four focus areas central to driving transformational change across Asia and the Pacific.

"External shocks, debt burdens, and climate change weigh heavily on the people and economies of the region. But we are not starting from zero. Growth remains solid, trade and economic integration are deepening, supply chains are diversifying, and digital connectivity and innovation are accelerating," ADB President Kanda said.

"Uncertainty is not a reason for retreat. It is a call to be bolder, to move faster, and to work more closely than ever before."

The first area of focus - to address the vulnerability of the region's food systems, ADB will scale up financing for food systems transformation to \$40 billion by 2030.

Second, ADB is investing in digital technologies to improve access to education, finance, and markets.

Third, ADB is investing in modernising and connecting energy systems, including readiness to commit up to \$10 billion to support work on the ASEAN Power Grid.

Fourth, ADB is deepening investments to build resilience by strengthening infrastructure, restoring and protecting ecosystems, and helping vulnerable communities adapt to the impacts of climate change.

ADB also reaffirmed its commitment to scale up private sector development, aiming to increase private sector financing four-fold to \$13 billion annually by 2030.

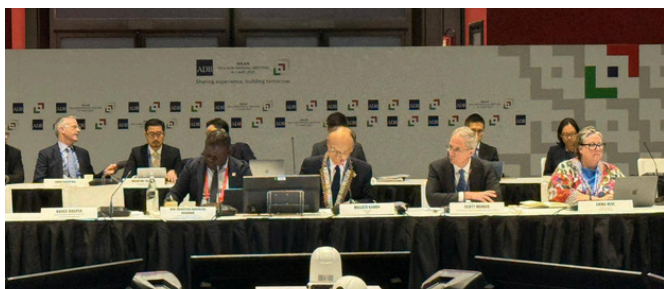

More than 5,000 participants attended the meeting consisting of government representatives, the private sector, civil society, and academia.

The ADB's approach for developments in Nauru emphasises consultative, flexible responses and focused, long-term engagement to optimise development outcomes. Support includes maritime transport, renewable energy, and urban development, and reforms to enhance public sector management, state-owned enterprises, and social protection.

ADB's development efforts, partnerships, and technical assistance are aligned with Nauru's National Sustainable Development Strategy 2019–2030 and have helped the government address the country's infrastructure needs, improve delivery of essential services and the performance of SOEs, reduce debt risk, and strengthen fiscal sustainability. //

ADB58: Pacific governors present joint statement at DMC prep meeting

Finance ministers of Pacific Developing Member Countries (DMC) voiced their outlook for a better Pacific in a joint statement at the Pacific DMC Governors meeting with ADB management and staff in Milan, Italy, 4 May.

Solomon Islands delivers joint Pacific statement

Solomon Islands' Permanent Secretary for Finance McKinnie Dentana presented the joint statement on behalf of the governors from Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Nauru, Niue, Papua New Guinea, Palau, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu.

The 14 Pacific DMCs hope for solutions to boost economic growth that's been low for the past two decades. The group notes the ADB's work on private sector development, and encouraged removing constraints and barriers that hinders business setup especially for micro, small and medium enterprise (MSME).

In that regard, the group seeks the ADB's continued support for local commercial banks in securing correspondent banking services that will facilitate economic transaction with trading partners and raise capital investment opportunities for local businesses.

"In a more practical situation, we would like it to be easier for our women and youth farmers to have access to safe financial services."

Mr Dentana says business as usual in building the Pacific's resilience against shocks is no longer practical as uncertainty from tariffs, geopolitical shifts, and conflicts strains international and regional cooperation.

"Free movement of people and investments can be mutually beneficial for the Pacific region including visa free Pacific."

ADB's tailored climate and disaster financing facilities to meet Pacific DMC needs is welcomed, recognising that it contributes to sustained growth, poverty reduction and natural resource management.

The group reiterated the call for the adoption of a multi-dimensional vulnerability index (MVI) to recognise their vulnerabilities but also readiness to impacts of climate change and life supporting sectors such as food, water, health ecosystem services, human habitat and infrastructure.

Pacific DMCs stressed the importance of the 2050 Strategy for the Blue Pacific highlighting the seriousness of the Pacific countries to transform and build a resilient Pacific region.

The group supports Australia's bid to co-host with PICs COP31 in 2026 as a Pacific COP to demonstrate that climate change is real in the Pacific region. It would serve to highlight Pacific culture and innovative solutions using traditional and cultural practices to adapt and build resilience.

Mr Dentana concluded the group looks forward to President Kanda's leadership and higher levels of engagement and partnership with the ADB, and to harness more innovative approaches and adaptability to the constantly changing economic landscape. //

Australia assists local emergency services

National Emergency Services Secretary Barassi Botelanga and Acting Australian High Commissioner Stephen Close signed the Australia Assists Arrangement (2025-2035), 29 April.

Botelanga and Acting Australian High Commissioner Close signed the Australia Assists Arrangement

The Australia Assists Arrangement is a humanitarian program aimed to improve disaster recovery, build local capacity, and empower local leaders to carry out effective humanitarian efforts.

The 10-year agreement will provide long-term partnership for disaster risk reduction and emergency management.

Mr Botelanga expressed his gratitude to the Government of Australia and highlighted the agreement's benefits for Nauru, including assistance for NES capacity building, better disaster preparedness, access to technical support, and strengthening local leadership in emergency management.

"The agreement emphasises collaboration, mutual understanding, and the importance of local leadership in disaster management."

Currently, Jeff Lee is the Australia Assists advisor working on the Nauru Airport Runway Resurfacing Project. //

ADB58: Nauru intervention underscores vulnerability

Nauru presented its intervention at the annual Asian Development Bank (ADB) meeting advocating for the country's vulnerability position.

Deputy Minister Thoma delivers intervention statement on behalf of President Adeang

Deputy Minister for Finance and Alternate ADB governor for Nauru, Delvin Thoma, delivered Nauru's intervention on behalf of President David Adeang at the ADB Constituency meeting in Milan, 4 May, a day ahead of the 58th Annual Meeting of the ADB Board of Governors.

DM Thoma said Nauru was pleased to formalise the landmark \$37.5m sustainable urban development investment with ADB – a significant step in improving the living conditions of Nauruans.

"This builds upon ADB's ongoing support to two of our most critical infrastructure projects: the Nauru Port Project and the Solar Farm Project," DM Thoma said.

"The Port Project is a transformative initiative that will enhance trade and connectivity, while the Solar Farm Project will soon enable Nauru to achieve 50 per cent of its energy needs from renewable sources—a major milestone in our energy transition journey."

DM Thoma notes the ADB's recognition of Nauru's unique vulnerabilities as a small island developing state remains deeply appreciated.

He advised that Nauru is working to deter the expected graduation to high-income status under Official Development Assistance (ODA) criteria from January 2026, which will effectively disqualify Nauru from accessing certain ADB financing based on gross domestic product (GDP) or other established criteria.

"Graduation should be measured not just by income, but by resilience and readiness," DM Thoma said, adding that Nauru is advocating for vulnerability-based assessments through the Multidimensional Vulnerability Index (MVI).

Nauru is engaging closely with donor partners to ensure continued access to critical funding for infrastructure and resilience-building projects.

Deputy Minister Thoma says Nauru remains committed to the partnership with ADB and looks forward to continue working with the ADB to achieve a sustainable and secure future for the people of Nauru. //

ADB58: Nauru concerned over graduation from OECD assistance

Nauru raised concerns of graduation from the Organisation for Economic Co-operation and Development (OECD) list of Official Development Assistance (ODA) recipients, at the 2nd Japan-Pacific Islands Finance Ministers' meeting on 5 May.

Nauru supports MVI adoption as guiding metric for international assistance

Deputy Minister for Finance Delvin Thoma attended the meeting, held on the margins of the annual Asian Development Bank meeting in Milan, and reiterated concerns that the graduation does not accurately reflect the realities of Nauru's economy.

"Graduation under the current criteria disregards our structural vulnerabilities as a Small Island Developing State," the Deputy Minister said.

"The Multidimensional Vulnerability Index provides a more accurate and comprehensive measure of our development context. Nauru strongly supports its adoption as the guiding metric for international assistance."

Nauru faces acute environmental and climate-related threats compounded by the prolonged drought and absence of natural fresh water sources.

DM Thoma thanked Australia for helping establish a Commonwealth Bank facility in Nauru, but underscores issues with the loss of correspondent banking relationships, disaster risk financing, and domestic resource mobilisation and infrastructure, with relevance to Nauru's vulnerabilities and urgent need for action.

Later in a bilateral meeting between DM Thoma and Japan's Vice Minister of Finance for International Affairs, Atsushi Mimura, discussions centred on the OECD graduation process and its implications for resource sustainability, highlighting Nauru's vulnerability as the most vulnerable Pacific island and the fifth most vulnerable country in the world.

Japanese support for infrastructure projects was emphasised, including high-quality, resilient infrastructure and job creation.

Japan's commitment to continued technical assistance and grants, even post-graduation from OECD, was reaffirmed, through schemes like ADB and the Asian Development Fund (ADF). The importance of digitalisation and connectivity, particularly the cable project, were underscored. //

Nauru raises economic challenges at World Bank, IMF meeting

Global institutions the World Bank Group and the International Monetary Fund (IMF) held their spring meetings in Washington D.C., 21-25 April, where Nauru raised key issues regarding its economic status.

DM Thoma (4th) highlights commitment to strength private sector growth among others

Deputy Minister for Finance and Sustainable Development Delvin Thoma led the Nauru delegation to the meetings, advocating for Nauru's economic interests.

The delegation held a series of high-level engagements raising key issues including the need to defer Nauru's upcoming graduation to High-Income Country (HIC) status due to ongoing economic vulnerabilities, climate-related challenges, and the unsustainable nature of current revenue sources.

The delegation also emphasised the importance of recognising the Multidimensional Vulnerability Index (MVI) in determining access to grants and/or concessional financing for Small Island Developing States like Nauru.

Deputy Minister Thoma highlighted the Government's commitment to strengthening private sector growth, advancing climate resilience initiatives, and improving financial governance.

Discussions were also held on state-owned enterprise (SOE) reforms, and opportunities to access new regional and global financing programs.

A key outcome was the support expressed by IMF and the World Bank for Nauru's efforts to build economic resilience and diversify revenue sources.

The delegation also confirmed preparations for the upcoming IMF Article IV Consultation visit to Nauru, 30 June to 11 July 2025.

The Government looks forward to strengthening partnerships and pursuing opportunities that enhance Nauru's economic stability, climate resilience, and development prospects. //

Minister Bernicke at World Internet Conference

Nauru highlights commitment to creating a supportive technological framework focusing on digital growth at the 2025 World Internet Conference Asia Pacific summit in Hong Kong, 14-15 April.

Minister Bernicke looks to a future in digital financial technology

Minister for Telecommunications Shadlog Bernicke attended the conference and spoke on the 'Inclusive Finance Empowered by Digital Intelligence', sharing Nauru's vision from its National Digital Transformation Strategy 2025–2030.

He says Nauru is committed to creating a supportive regulatory and technological framework, asserting that even as one of the world's smallest country, Nauru is focused on digital growth and empowering its citizens through innovative financial technologies.

“As part of [the] Nauru National Digital Transformation Strategy 2025-2030, our vision for Nauru is to continue this path towards digital development through innovative solutions to equip our citizens to be at the forefront of digital financial technologies in the future.

“With Pacific's first ever Starlink Community Gateway in place and the arrival of the East Micronesia Cable later this year, Nauru is already well placed to accelerate towards a fully cashless economy,” the Minister stated.

The event was hosted by World Internet Conference (WIC) and the minister's visit fully funded by the Government of the Hong Kong Special Administrative Region of the People's Republic of China and WIC.

Almost 1,000 attendees gathered to explore future potential developments across various domains in digital technology, focusing on the theme: Integration of AI and Digital Technologies – Shaping the Future: Jointly Building a Community with a Shared Future in Cyberspace.

The Vice-Chairman of the Chinese People's Political Consultative Conference, Mr Wang Yong, emphasised China's dedication to fostering global collaboration in digital innovation, security, and governance. //

Nauru supports UN security reform to include SIDS

Nauru reaffirms support for a comprehensive reform of the UN Security Council and calls for a seat for Small Island Developing States.

UN Ambassador Daniel highlights imbalance in UN security membership

Nauru reaffirms support for a comprehensive reform of the UN Security Council and calls for a seat for Small Island Developing States.

Nauru's Ambassador to the United Nations Lara Daniel addressed the informal meeting of the plenary on the Intergovernmental Negotiations about fair representation and expanding the Security Council's membership at the United Nations Headquarters, 15 April.

"Nauru reaffirms its support for a comprehensive reform of the Security Council, and emphasise the five clusters identified in General Assembly decision 62/557 are interconnected."

The five clusters include the relationship between the Security Council and the General Assembly, focusing on their coordination and the Assembly's oversight role; the size and methods of an expanded Security Council, discussing potential member increases and working methods like transparency and meeting frequency.

Additionally, membership categories examines permanent versus non-permanent members and the possibility of new membership types; and the question of the veto which considers limits on the veto power of permanent members or its complete removal.

The fifth cluster being regional representation, addresses fair representation for various regions and the potential for more seats or new regional groups.

Ambassador Daniel says discussions on these issues cannot and should not proceed in isolation, and appreciates the ongoing efforts of the Chair and hopes for a unified model for negotiations.

She says the imbalance in the Security Council's permanent membership presents a valuable opportunity for improvement.

Prioritising equity and representation is essential for enhancing the Council's credibility and legitimacy, fostering a more inclusive and effective organisation."

"Nauru supports calls to expand the Council to about 27 members to address structural inequalities that continue to marginalise developing countries, especially in Africa, Latin America, the Caribbean, and the Pacific.

"As part of this effort, Nauru strongly advocates for the establishment of a dedicated seat for Small Island Developing States (SIDS). Such a seat would ensure that the unique perspectives and vulnerabilities of SIDS are represented in the Council's decision-making processes and would be a tangible step toward a more inclusive, equitable, and responsive Security Council."

Ambassador Daniel notes that at the founding of the UN, one-third of the world's population was living under colonial rule, and while there has been progress, she says the Security Council still mirrors the power dynamics of the past.

A reform is essential for improved representation of all member states, enhancing the Council's effectiveness, inclusivity, and legitimacy through better operations and robust checks and balances.

"Let us approach this challenge with optimism and determination. The opportunity for meaningful reform is at hand, and we are ready to embrace it," Ambassador Daniel said. //

Anzac day dawn service

'They shall grow not old, as we that are left grow old: Age shall not weary them, nor the years condemn. At the going down of the sun and in the morning. We will remember them'.

President Adeang lays wreath at 110th Anzac day anniversary

Master of ceremony Andrew Baker led the Anzac Day dawn service held at the Anibare Village on the eastern side of the island, 25 April.

As the sun gently rose from the horizon against the soft drizzle of rain, Australian High Commissioner Matthew Barclay delivered the ANZAC Day commemorative address before the laying of wreaths and the recitation of the Ode of Remembrance.

His Excellency President David Adeang laid a wreath honouring the sacrifices of war veterans.

Attendees from the Nauruan, Australian and New Zealand communities observed a minutes' silence and the playing of the Last Post and the Reveille.

This year marks the 110th anniversary of the landing of Australian and New Zealand soldiers known as the Anzacs, on Gallipoli in 1915. ANZAC Day was first observed in 1916. //

Facilitating the future of air transport

Nauru reaffirmed its commitment to regional cooperation on air transport and the need for greater support to building resilience and capacity within the Pacific aviation sector.

Minister Aliklik says conference theme resonates deeply with Nauru

Minister for Transport Reagan Aliklik addressed the International Civil Aviation Organisation (ICAO) Facilitation Conference (FALC2025) in Doha, Qatar, 14-17 April, emphasising the importance of strengthening aviation facilitation and border management in Small Island Developing States (SIDS) such as Nauru, while maintaining a balanced approach to aviation security.

FALC 2025 focuses on promoting collaboration, efficiency, and inclusivity in global air travel, under the theme, Facilitating the Future of Air Transport.

The Minister says the conference theme “resonates deeply with Nauru”.

“For a Small Island Developing State like Nauru, air connectivity is not a convenience; it is a necessity. It is our bridge to essential services, economic opportunity and regional solidarity.

“We must recognise that the future of air transport must be safe, secure, efficient, and inclusive,” Minister Aliklik said.” Nauru has taken steps to improve facilitation at its border and progression towards compliance with ICAO standards of streamlining air transport and laying the groundwork for future integration of passenger data systems and digital credentials.

“These are not small tasks for a small country, but we are committed to doing our part,” the Minister said. Challenges for SIDS remain significant as they are faced with technical, financial and capacity constraints that limit their abilities to implement facilitation reforms at the pace of larger states.

Minister Aliklik encouraged ICAO and development partners to continue supporting states with targeted assistance, especially the most vulnerable and remote. He says Nauru looks ahead and stands ready to work with others on regional solutions that promote shared systems, common training, and technical cooperation.

“These initiatives are key to ensuring that no country is left behind in the journey towards a more seamless global aviation system.”

The Doha Ministerial Declaration on Facilitation of International Air Transport outlines the collective goals of affirming the critical role of air transport facilitation in ensuring the efficient and seamless movement of passengers, crew, cargo, aircraft across borders, facilitate trade and provide humanitarian response in crises.

Ministers urge states, ICAO, international and regional organisations, industry and other stakeholders to emphasise the importance of air transport facilitation to ensuring a safe, secure and sustainable civil aviation sector as a global facilitation governance aspect.

To actively engage in international frameworks and decision-making fora, strengthen mechanisms to establish robust partnerships with immigration and border control agencies, customs and health authorities. The health plan to be developed in line with World Health Organisation’s international health regulations.

The declaration also urge the facilitation of passenger journey and protecting rights of people with visible and non-visible disabilities and reduced mobility by ensuring their involvement in decision-making processes and other efforts to achieve a disability-inclusive air transport system.

Ministers also urged enhancement of data, innovative technology and skills processes to improve all aspects of air transport facilitation. //

Fire contained at lands and survey office

The Lands and Survey office is assessing damages after an electrical fire from a split air-conditioning unit broke out in its conference room around 8pm on Thursday, 1 May.

Fire damage estimated to be \$25,000

Damages to files and equipment are minimal as the fire was caught in time and quickly contained. Initial odour of an electrical burn was detected by an on-duty cleaner who informed the head of department and the Fire and Emergency Services when the electrical smoke turned into fire.

cont pg 7....

Fire contained at lands and survey office

A single cabinet containing more than 200 large old maps was the only asset of significant value that was lost. These are the original works and map drawings of former surveyors who had been employed with the department for decades, and are now either retired or passed on.

These files however, are not totally lost. Along with other files and maps, they have been electronically saved and backed up on AutoCAD software and Geographic Information System (GIS).

AutoCAD software is used for creating precise 2D and 3D designs, while GIS Surveying combines traditional surveying techniques with computer software, hardware, and data acquisition techniques to capture, manage, analyse, and display geospatial data in a visual format.

The cabinet containing these maps was the closest unit to the air-conditioner, hence sustained the most damage. Three desktop computers and a projector screen were also damaged.

Four other map-storing cabinets were unharmed, as well as the administration books for maps containing all land portions in Nauru by district.

The Department estimates the value of damages at around \$25,000.

Cleaning, electrical inspection, and structural damages are being assessed to ensure a return to a safe working environment from Wednesday 7 May.

The public should not be alarmed as all maps are on backed up software and every effort is being made to ensure similar incidents are prevented. //

Ambassador to Israel, Lara Daniel

Ambassador Lara Daniel presented her credentials to the President of Israel, His Excellency Isaac Herzog on 28 April, formally accrediting her as the non-resident Ambassador Extraordinary and Plenipotentiary of the Republic of Nauru to the State of Israel.

UN Ambassador Daniel presents her Letter of Credence to Israel President Herzog

President Herzog expressed his hope to significantly enhance the bilateral relations between their nations, highlighting the great potential for cultural exchanges and collaboration in agricultural technology between Israel and Nauru.

Phosphate MOU with Rabi leaders

As a step toward fostering collaboration and sustainable development, RONPHOS and the Rabi Council of Leaders, representing the Banaban community, have formalised their partnership through a Memorandum of Understanding (MOU).

Minister Bernicke and Rabi officials sign MOU for phosphate related projects

RONPHOS Minister Shadlog Bernicke and Rabi Administrator Jacob Karutake signed the MOU. The MOU that was ratified on 25 April will lay the foundation for a strategic partnership to explore and implement phosphate-related projects on Ocean Island, aiming to address long-standing challenges caused by primary phosphate mining and promote sustainable development.

This collaboration emphasises capacity building, infrastructure improvement, environmental rehabilitation and sustainable employment for Banabans on Ocean Island. It also includes RONPHOS assisting in developing a potential crushing plant on Ocean Island.

The MOU acknowledges the Kiribati government's sovereign jurisdiction over Ocean Island. With a shared vision of fostering economic growth and community empowerment, both parties will focus on key areas such as technical and engineering support, capacity building, project development, waste management, and funding opportunities.

The MOU reflects a commitment to use a sustainable resource, and this partnership represents a significant milestone in addressing historical challenges and projecting a future of collaboration, innovation, and environmental stewardship for Ocean Island. //

Israel's Ambassador to Nauru and the Pacific Mr Roi Rosenblit was also present at the occasion.

Nauru and Israel established diplomatic relations in 1994 and have since maintained a close, mutually beneficial partnership, having cooperative measures in health, agriculture, water and food security.

Mr Sean Oppenheimer has been the Honorary Consul of the State of Israel to Nauru since 2012. //

No UXOs found during runway investigation

The ongoing work on the airport runway of investigating and removing anomalies has not unearthed any Unexploded Ordnance (UXO) to date.

Anomalies along runway proving low risk

The Government of Nauru, in partnership with the Government of Australia, has initiated the Nauru Airport Runway

Resurfacing Project involving investigating and safely removing 96 metal anomalies beneath the runway, some of which may be UXOs from World War II.

The runway, operational for over 30 years, is being upgraded to enhance safety and maintain international certification, with a strong focus on public safety through a strict “no risk” policy.

The UXO investigation and removal activities commenced on 28 April and will continue until all anomalies have been investigated.

On 1 May, Minister for Transport Reagan Aliklik joined acting Australian High Commissioner Stephen Close at

the UXO anomaly investigation site for a walkthrough of the project at the Nauru International Airport.

To date, 47 out of 96 anomalies identified have been investigated near the central, west-central, eastern section of the runway and below the tarmac revealing a mix shallow, low risk anomalies and higher deeper anomalies. No UXOs have been found. This leaves 49 anomalies still to be investigated.

The Minister had a brief meeting with key stakeholders including, Secretary for National Emergency Services (NES) Barassi Botelanga, project contractors from Downer and Palladium, and officials from the Civil Aviation Authority.

The Downer’s Senior Project Manager – Transport & Infrastructure Peter Murr provided an update on project coordination and logistics; while UXO investigation lead Brian McIntyre briefed the Minister on the detailed methodology, operational steps, and progress of the anomaly investigation.

Minister Aliklik expressed his appreciation to the contractors for a successful initiation and progress of this project. This visit reaffirms the Government of Nauru’s strong commitment to safety, international cooperation, and infrastructure development. //

Pope Francis tribute.

The Government and people of the Republic of Nauru join the global community of the faithful in mourning the loss of His Holiness Pope Francis.

President Adeang lays wreath at Pope Francis mass

Pope Francis last visit to the Pacific in September 2024 was to Papua New Guinea when President Adeang had the opportunity to meet His Holiness; an encounter that remains as a treasured memory and a source of spiritual strength.

Nauru offers prayers for the eternal repose of his soul and for comfort to all who grieve his passing. The Nauru national flag flew at half-mast until the burial of His Holiness.

President David Adeang declared a public holiday on Friday 25 April in observance of the occasion, and attended the Requiem Thanksgiving Mass at Christ the King Church in Arubo, Ewa District, where he laid a wreath. Parish Priest Fr Robati Tebaieua, MSC, led the service.

In a condolence letter to the Vatican, His Excellency President Adeang paid tribute and conveyed heartfelt condolences.

“His Holiness was a true shepherd of peace, humility, and compassion. Throughout his papacy, he inspired the world through his tireless advocacy of the poor and the vulnerable, his courageous voice for justice and equality, and his unwavering call for unity, mercy, and hope,” President Adeang said. //
